

What kind of problem is the game solving?

1. Either Government officials or Communities tend to show conflict in the same room.
2. Lack of participation within a lot of people.

#### Objective

1. To understand how the decisions are being taken when Government and communities exist
2. To understand scale of inclusion of multiple parameters in decision-making
3. To sensitise government and community of the issues and necessary interventions

Game masters Judging criterial of proposal will be shown later

1. Suggestion from a Scientist/Academician on technical aspect
2. Suggestions from a women
3. Suggestions from a social-scientist
4. Suggestions from a Community member
4. No use of power cards will reduce points

#### Boundary conditions

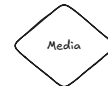

Geographical Area (Decide based on interest)  
Natural entity (Decide based on interest)  
Seasons (Selection of area's season based on random card show)

1. Game Master picks a season card
2. Game Master picks an extreme events card

#### Power Room

Power room can be designed based on availability of stakeholders

Informing media circulates messages with all the rooms. Each time Media is used to circulate a message points will be given
